1. International trade, Alberta

Preface

In 1991, Alberta reconfirmed its ability to deliver in a highly competitive global economy.

By building on our province's solid reputation as a supplier of goods and services to the world, the value of Alberta exports rose substantially for the fifth consecutive year. The 1991 total of \$17.81 billion represents an increase of about \$600 million over 1990, reflecting growth in both merchandise and service exports.

Despite a North American recession that has seen a loss of 232,000 jobs nationwide, Alberta has had one of the stronger economies in Canada. The province continued to show growth in the areas of job creation and exports. Our success in this tough economic climate can be attributed in large measure to Alberta's commitment to economic diversification.

Traditionally, energy and agricultural products have been the greatest contributors to Alberta's export success. Through the accelerated growth of industries exporting value-added products, our province's dependence on the two stalwarts has been significantly lessened. As this trade review reveals, more than 29% of our merchandise exports now consist of manufactured and processed goods, including forest products, processed foods, electronics and transportation equipment.

Our province's service sector has added substantially to the high international trade profile Alberta enjoys. This sector covers such diverse areas as tourism, business and engineering services, and accounted for \$1.67 billion in export sales in 1991.

By engaging in worldwide trade with approximately 150 countries, Alberta companies have shown that they can penetrate the world's most competitive markets. Staying ahead in this changing global marketplace requires that government and the private sector continue to work together in developing market strategies that open up new markets and expand export trade in existing areas.

While firmly entrenched in traditional markets such as the United States and Europe, Alberta exporters continue to take a leadership role in developing the tremendous potential that exists in emerging markets. Alberta continues to show solid export growth with our trading partners in Asia and the Pacific Rim. As well, there is a lot of excitement in the export community surrounding the proposed North American Free Trade Agreement.

There are over 260,000 jobs in Alberta that can be linked to international trade. From large corporations to small community-based exporters, it is the efforts of these Alberta companies that allow us to build a more diverse provincial economy.

This review of Alberta's 1991 export performance is aimed at providing a basic source of information to Alberta businesses looking to expand into the global market. You are invited to take advantage of the many programs and resources offered by Alberta Economic Development and Trade to help you capitalize on your opportunities. By working together, we will forge a stronger Alberta.

Toward 2000 Together

Alberta Exports in the International Marketplace

■ International Trade Arena

Albertans have been historically outward-looking, creating goods and services which are sold in international markets throughout the world. Alberta's standard of living and quality of life have been built on the ability to compete in the global arena. In 1991, that ability was reflected in exports of \$17.81 billion, representing nearly 25% of the Province's gross domestic product. Every day of the year, Alberta exported more than \$48 million worth of goods and services, as business and industry supplied markets in close to 150 countries around the world.

Exports generate jobs. Over 260,000 jobs in the province depend directly or indirectly on international trade. With a total labour force of 1.4 million Albertans, this means that one out of every five jobs depends in some way on international trade.

Trade also provides other important benefits for Albertans. It is a basic component of economic growth and diversification. Alberta is a relatively modest market of 2.5 million people and Alberta business and industry must have access to larger markets if they are to lower costs, expand production, diversify, and achieve their full potential. When they are successful in expanding existing markets and opening up new markets for goods and services, Alberta's economic base is strengthened and diversified.

■ The Global Situation

Businesses are seeing the world transform around them. Dramatic political and economic changes in Eastern Europe and the Soviet Union have ended 40 years of cold war stalemate. In Latin America and parts of Asia and Africa, countries have introduced democratic institutions and opened up their economies. Emerging regional identities are fundamentally realigning global relationships. With these changes affecting all of Alberta's major markets, the province will have to respond quickly to both the challenges and opportunities presented by a new world economy unlike anything seen before.

North America

The implementation of the Canada/U.S. Free Trade Agreement (FTA), which began in January 1989, will see virtually all tariff and non-tariff barriers between the two countries eliminated by 1998. Negotiations on a North American Free Trade Agreement have reached an initial conclusion. If ratified by all participants, the Agreement will result in the largest single market in the world, comprising more than 360 million people and a gross domestic product of over \$6 trillion.

Asia/Pacific Rim

With increased political stabilization and rapid economic growth, this region continues to be one of the province's fastest growing markets.

Europe

The commitment by the European Community to eliminate internal barriers to trade by December 1992 will open up a huge market of over 300 million people and a gross domestic product of \$5 trillion. The dramatic changes occurring in Eastern Europe and the former Soviet Union will also create important new opportunities for Alberta companies.

Latin America/Africa

These two regions are moving toward more democratic institutions and are rapidly opening up their markets to trade and investment. Many of the principal economies in the region have addressed some of their international debt problems and are creating new and important opportunities for additional exports from Alberta.

An Alberta Strategy for Exports

Alberta has developed a dynamic export sector. To ensure the continued growth of this important sector, a strategy involving initiatives in four areas — trade policy, investment, competitiveness, and trade promotion — has been developed.

The first pillar, Alberta's trade policy, promotes liberalized trade, ensuring Alberta exporters have access to major markets. The primary objective has been to enhance and secure access to other markets, reducing barriers to trade whenever possible. Alberta's efforts have focused on the Multilateral Trade Negotiations, the Canada/U.S. Free Trade Agreement, the North American Free Trade negotiations with Mexico and the United States, and the European Energy Charter. These initiatives have allowed Alberta producers to make long-term investment decisions and have attracted more investors to the province. The investment, in turn, has allowed the private sector to achieve technological changes and economies of scale which enhance its international competitiveness.

The second pillar revolves around investment and investment policy. Alberta has relied on investment from both Canadians and foreign sources throughout its development. Investment generates jobs, facilitates economies of scale, and encourages technology transfer. At the same time, much of Alberta's investment is based on providing goods and services to a market outside the province and requires the market access supported by trade policy initiatives.

The third pillar is competitiveness. The ability to remain competitive will, in large part, be driven by Alberta's capacity to compete in international markets for new investment and obtain the market access to expand exports.

Through Toward 2000 Together, the Alberta Government has initiated a comprehensive discussion among all Albertans to address issues related to improving competitiveness. Included are such issues as provincial and local corporate taxation, regulatory environments, education and training, encouragement for innovation and research and development, and improved business labour relations. When completed in 1993, this will provide the foundation for a series of initiatives designed to keep Alberta competitive into the next century.

The fourth pillar involves a comprehensive trade promotion strategy. To promote exports from Alberta, Alberta Economic Development and Trade offers programs designed to assist Alberta businesses. These include Export Trade Readiness for Alberta (EXTRA), Transportation Export Services for Trade (TEST), Winning Initiatives Through Trade Shows (WITTS), Market Development Assistance Program (MDAP), Export Loan Guarantee Program, New Exporters to Border States (NEBS), and New Exporters to U.S. South (NEXUS).

■ Export Market Development

Alberta's export market development strategy is part of a broader economic development approach which has been designed to ensure that all Albertans benefit from the development of the provincial economy. Focusing on value-added goods and services, it seeks out means by which the government and private sector can ensure that Alberta expands exports of goods and services in increasingly competitive international markets. This will support Alberta's diversification efforts and balance regional growth, small business development, tourism and technological development objectives.

Alberta has identified three priority regions: North America, the European Community, and Asia/Pacific Rim countries. While opportunities in other sectors or regions are pursued, the focus will be on these three important markets.

North American Market

The Free Trade Agreement with the United States and the negotiation of a North American Free Trade Agreement with the United States and Mexico provide the basis for broadening Alberta's trade relations with both countries. Alberta continues to pursue opportunities to further increase and secure access to United States and Mexican markets.

European Community

The European Community will become a single market at the end of 1992 with virtually every internal barrier to trade eliminated. This will be the largest trading economy in the world with annual trade of more than \$1.5 trillion.

Alberta's trade initiatives are designed to help Alberta companies penetrate the European Community today and plan strategies for expanding their market penetration over the remainder of the decade.

Asia/Pacific Rim

This region is responsible for over 40% of the world's trade and 50% of the population. It has the world's most rapidly growing developed market in Japan and five of the fastest growing "new tigers" in South Korea, Hong Kong, Singapore, Taiwan, and Thailand.

Alberta maintains special relationships with Hokkaido in Japan, Heilongjiang in China, and Gwango in Korea. The combination of the province's long-term relationships with these areas and the rapid growth in the region provides a strong foundation for expanding exports to Asia and the Pacific Rim.

Latin America, the Caribbean, the Middle East and Africa

The government will continue to provide support programs which allow Alberta companies to pursue opportunities in these areas.

The Year
in Review

About the Data

This publication is intended to provide a convenient data source for Alberta's international trade in goods. For each country to which Alberta exported at least \$1 million in 1991 a profile of the top 15 Alberta exports to that country is presented. For comparative purposes, Canadian exports are also shown. A summary of export totals to all countries is included in Appendix A.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988. Since a different system of categorization was in use prior to that period, comparisons on an itemized basis are not reliable.

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, commodity descriptions accompanying these codes may have been revised slightly from their standard format. Readers requiring the exact content of a particular HS number, therefore, are referred to the Customs Tariff Schedule of Canada.

In 1990, a new system of data exchange was initiated between Canada and the United States. Improved data capture resulted in higher export values for most of the commodity categories traded to the United States. While this will not affect comparisons between 1991 and 1990 data, caution should be used in interpreting longer-range trends which include export data to the United States.

Exports by geographic region, industry, and commodity are also provided in the following sections. Regional groupings are adopted from Statistics Canada. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see table this page). For commodities, six-digit HS codes have occasionally been grouped in order to present more commonly understood descriptions.

Statistics Canada is the main source for this publication. However, Alberta Agriculture publishes export statistics for agricultural commodities which more accurately reflect Alberta's contribution to Canada's agricultural production for export. The system is based on HS codes but better allocates exports to their point of origin. On a net basis, Statistics Canada underestimated Alberta's agricultural exports in 1991 by \$121 million based on this system.

Informational captions appearing at the top right corner of each country profile are sourced from the "Handbook of Nations, 11th Edition" published by the U.S. Central Intelligence Agency, "International Financial Statistics" published by the International Monetary Fund, and, where appropriate, Alberta Tourism.

The term "exports" refers to "domestic exports": goods grown, extracted or manufactured in Canada, and includes goods of foreign origin which have been materially transformed in Canada and then exported.

Unfortunately, service exports cannot be included on a country-specific basis since these data are not presently available. However, total service exports (including tourism) have been provided in the following "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

Standard Industrial Classification Codes (1980) Included in Industry Groupings

The Year in Review

Alberta's exports of goods and services amounted to \$17.81 billion in 1991, a 3.5% increase over 1990. Exports of services, estimated at \$1.67 billion, grew by 9.2% while exports of commodities, at \$16.14 billion, expanded by 2.5%.

Alberta Exports by Industry, 1991

Although commodities export growth was moderate, any expansion was seen as positive during a year of many negative influences on international trade. Among them:

- the value of the Canadian dollar continued to increase in value against the currencies of several of Alberta's major export markets.
- the persistence of slower economic growth in many regions and countries restrained demand and consumption in those markets. Growth in the countries of the Organization for Economic Cooperation and Development (OECD), for example, grew only 1% in 1991. The OECD represented a market for over 80% of Alberta's international commodity exports.
- continuing economic and political restructuring in Eastern Europe, post-war rebuilding in the Middle East, and more immediate prospects for tighter economic integration in Western Europe created an element of uncertainty for business in these markets.
- soft commodity prices in the energy industry and certain segments of agriculture dampened the earning potential of Alberta's mainstay exports.

In the midst of these and other events, Canada's international commodity exports declined by 2.5% in 1991. Alberta, too, was affected. Agriculture exports declined while mining industry sales grew only marginally (although gains in export revenues from natural gas were more impressive).

Alberta's overall export growth, then, was led by exports of manufactures, which continue to represent an increasingly important element of the province's international trade portfolio. International sales of manufactures in 1991 accounted for close to 30% of the total value of Alberta exports, up by two percentage points over the previous year.

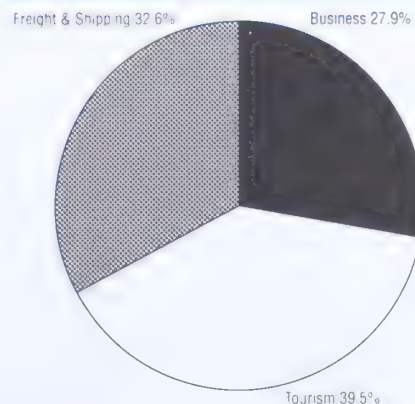

Manufacturing is also one of the more geographically diversified export industries. Typically, the United States was Alberta's main foreign market, but its share of Alberta manufactures exports — nearly 60% — was lower than its share of total exports — 73%.

Alberta again exported to almost 150 countries in 1991. Exports increased to eight of the top ten markets compared to 1990. By region, only Africa represented a declining market over the two-year period, primarily the result of diminishing sales to Morocco and South Africa. Despite the embargo which eliminated trade with Iraq, the Middle East was Alberta's fastest-growing regional market in 1991. Western Europe — where only France and Sweden posted declines among the top regional markets — ranked second.

The importance of exports to Alberta's economic well-being is underscored by its contribution to production and employment. Exports accounted for almost 25% of Alberta's gross domestic product in 1991, an increase over the share registered in 1990. Also, an estimated 260,000 Albertans were employed both directly and indirectly as a result of international export activity.

Exports of services accounted for approximately 10% of Alberta's total international sales in 1991. Tourism comprised the largest share of services exports, generating an estimated \$660 million or almost 40% of total services export revenue. Freight and shipping exports were estimated at \$544 million while business services, ranging from management consulting to engineering, earned another \$466 million.

Alberta Service Sector Exports, 1991

Alberta Exports by Industries, Commodities, and Countries

Driven by expanded shipments of manufactures, Alberta's total international commodity exports increased from \$15.7 billion in 1990 to \$16.1 billion in 1991, a moderate gain of 2.5%. Slower gains in the value of mining industry exports and declines in exports of primary agriculture industry products were more than offset by strong growth in the manufacturing industry.

Notes: Industry breakdowns are based on Statistics Canada's 'Concordance Between the Canadian Export Classification, 1988 and the Standard Industrial Classification, 1980'. See section on 'About the Data' for additional information.

Mining industry products, consisting primarily of crude petroleum and natural gas, accounted for 56.6% of total commodity exports in 1991, a smaller share than in 1990. Primary agriculture industry exports experienced a similar decline, accounting for 12.4% of total value in 1991 against a 13.6% share the previous year. Manufactured exports, however, realized a two percentage point gain in share to account for 29.5% of total export sales in 1991.

Nine of the 16 manufacturing industries posted gains in international exports over the two-year period, most notably transportation equipment, primary metals, paper and allied products, and plastics. Gains here and elsewhere were sufficient to offset declines in categories such as non-metallic mineral products, fabricated metals, and electrical and electronic equipment, leading to an overall gain of 9.9%.

Alberta Exports by Industry, 1991

Agriculture and Related

The combined value of Alberta's primary agriculture and food and beverage exports was \$2.51 billion in 1991, a 6.5% decline from 1990. Among the top ten commodity exports, only live cattle, beef, and canola oil and mustard oil registered gains over the two-year period.

Although the quantity of wheat exported rose markedly in 1991, the total sales value declined by 2.4% compared to 1990, a result of significantly reduced export prices attributable, in part, to international subsidy wars. After impressive gains in 1989 and 1990, barley exports decreased by 27.9% to near-average levels in 1991.

For the second successive year, live cattle exports increased significantly in both quantity and value. The 1991 export volume totalled 300,097 head, up 24,511 head from 1990. Combined with an overall higher average price during the year, this increased volume resulted in a 14% rise in export value, to \$286.6 million. Sustained demand for feeder and slaughter cattle in the United States was the main reason for this increase.

Canola seed exports in 1991 were only slightly reduced in quantity but total export value was down significantly as a result of sharply lower export prices. Alberta exports

totalled about \$202 million from 707,072 tonnes compared with \$230 million from 734,385 tonnes in 1990.

Alberta's Major Agricultural Exports (Includes Food & Beverage Manufacturing)

	1990 (\$000s)	1991 (\$000s)	Percent Change
Wheat	1,037,746	1,013,227	-2.4

All Countries	2,518,114	100.0

Forestry and Related

Alberta's forestry products exports (including the primary portion of the industry as well as wood products and paper and allied products manufacturing) rebounded in 1991 to post a gain in value of 7.9% over 1990. Although exports of primary products (raw logs) and wood products declined by 44.9% and 11.3% respectively, a gain of 20.2% in paper and allied industry sales was more than sufficient to offset this loss.

Much of the overall gain was attributable to exports of wood pulp (all grades), which increased from \$376 million in 1990 to \$452.5 million in 1991. Exports of lumber, mostly softwood coniferous, declined by 12.7% while exports of

the wood industry product particle board declined by 6.7% over the two-year period.

Alberta's Major Forestry Exports (Includes Wood Products & Paper & Allied Manufacturing)

	1990 (\$000s)	1991 (\$000s)	Percent Change
Wood pulp	376,016	452,499	20.3
Lumber	171,230	149,458	-12.7
Particle board	65,038	60,673	-6.7
Fibre board	16,213	15,881	-2.0
Paper & paper board	10,493	14,552	38.7
Total Above	638,990	693,063	8.5
Total All Forestry	659,554	711,704	7.9

The United States was Alberta's main foreign market for the forestry industry accounting for 88% of the export value of wood products, 59% of paper and allied products, and 68% of the overall industry. Alberta shipped wood products to an additional 18 countries and paper and allied products to 36 non-U.S. destinations.

Forestry Products Exports Alberta's Main Markets (Includes Wood Products & Paper & Allied Manufacturing)

	1991 (\$000s)	Percent of Total
United States	484,282	68.0
Japan	94,614	13.3
South Korea	27,056	3.8

Belgium	14,913	2.1
Total Above	638,077	89.7
All Countries	711,704	100.0

Mining

Alberta's exports of mining industry products amounted to \$9.14 billion in 1991, a slightly less than 1% increase over the previous year's value. All but about 5% of the industry's exports comprised crude petroleum, natural gas, and sulphur. Combined sales of these three products increased by 2% in value in 1991 compared to 1990.

Almost all of this segment of the industry's gain was attributable to a 16.1% increase in exports of natural gas, which expanded from \$2.6 billion in 1990 to more than \$3 billion in 1991. At least part of the improvement resulted from lower gas prices; the volume of sales (40.2 billion cubic metres in 1991) increased at a higher rate (28.4%) than did the value. Crude petroleum exports declined 3.2% by value over the same period despite volumes increasing from 33.3 million cubic metres in 1990 to 36.4 million cubic metres in 1991.

International sales of Alberta coal, almost all bituminous, dropped by 12.7% in 1991, or almost \$72 million from levels recorded the previous year. This was accompanied by a 16.1% decline in quantities shipped to foreign markets.

Alberta's Major Mining Exports (All Mining)

	1990 (\$000s)	1991 (\$000s)	Percent Change
Crude petroleum	5,289,630	5,121,473	-3.2
Natural gas	2,623,908	3,047,208	16.1
Sulphur	607,349	530,237	-12.7
Coal	509,648	437,835	-14.1
Natural barium sulphate (barytes)	2,299	2,660	15.7
Total Above	9,032,834	9,139,413	1.2
Total All Mining	9,063,039	9,141,281	0.9

The United States was, by far, Alberta's largest foreign market for the mining industry, accounting for more than 90% of the value of the industry's exports; all but 2% of the United States market for mining products comprised oil and gas. Japan was Alberta's largest export market for bituminous coal.

Mining Products Exports Alberta's Main Markets (Includes All Mining)

United States	8,269,354	90.5
Japan	339,232	3.7
South Korea	93,072	1.0
Morocco	87,672	1.0
Brazil	54,514	0.6
Total Above	8,843,844	96.7
All Countries	9,141,281	100.0

Manufacturing

Alberta's international exports of manufactures amounted to \$4.76 billion in 1991, an increase of almost \$430 million over 1990. Exports of the chemicals and chemical products industry accounted for the largest share of value within manufacturing — 31.3%. Remaining sales were relatively well dispersed across the other main industries.

Wood pulp (all grades) was Alberta's highest valued commodity export in the industry, accounting for almost 10% of the total export value of manufactures. Classified to the chemicals and chemical products industry, polyethylene was a close second. Of the top ten commodity exports in manufacturing, propane (liquefied) and styrene posted the largest declines in value; methanol and butanes (lique-

fied) recorded the largest increases, exceeded only by exports of aircraft.

Alberta's Major Manufactured Exports

	1990 (\$000s)	1991 (\$000s)	Percent Change
Wood pulp	376,016	452,499	20.3
Polyethylene	430,793	425,486	-1.2

All Countries	4,761,732	100.0

Machinery

Exports of machinery amounted to \$192.7 million in 1991, a 10.4% increase over values registered in 1990. The industry's share of total export value remained relatively steady at slightly more than 1%.

Many of the top-ranked products were related to the oil and gas industry. For example, boring and sinking machinery accounted for nearly one third of the industry's international sales. Construction and agricultural machinery exports also posted significant values.

Alberta's Major Machinery Exports (Excludes Electrical & Transportation Equipment)

	1990 (\$000s)	1991 (\$000s)	Percent Change
Boring & sinking machinery & parts	44,836	60,723	35.4
Machines, nes. & their parts, having individual functions	10,951	30,667	180.0

Total Above	132,381	68.7
All Countries	192,729	100.0

Electrical and Electronic Equipment

At \$256.6 million in 1991, the industry's exports declined by \$39.3 million or 13.3% from levels recorded in 1990. This was largely attributable to weaker performance among the four top ranked commodities exported by the industry.

Alberta remained, however, a major supplier within Canada of electronic equipment, accounting for one quarter to one third of total Canadian exports of these same four commodities.

The United States took nearly two thirds of the industry's international exports while the United Kingdom ranked a strong second. Telephonic or telegraphic switching apparatus was Alberta's top export to the United Kingdom.

Alberta's Major Electrical & Electronic Equipment Exports

	1990 (\$000s)	1991 (\$000s)	Percent Change
Telephone sets	49,115	44,134	-10.1
Transmission apparatus for radiotelegraph incorporating reception apparatus	55,297	43,313	-21.7

Refined Petroleum and Coal Products

The industry was Alberta's second most significant exporter among manufacturers, accounting for 4.3% of total commodity exports in 1991. Exports reached more than \$700 million and increased by 2.4% over 1990.

Much of the overall gain was attributable to a 70.3% increase in shipments of liquefied butanes, which offset losses in other categories such as liquefied propane and petroleum gases.

Alberta's Major Refined Petroleum & Coal Products Exports

	1990 (\$000s)	1991 (\$000s)	Percent Change
Butanes, liquefied	147,694	251,451	70.3
Propane, liquefied	294,771	243,172	-17.5
Petroleum oils other than crude	171,132	133,830	-21.8
Petroleum gases, liquefied, nes	30,851	28,330	-8.2

Total Above	700,552	99.98
All Countries	700,699	100.00

Chemicals and Chemical Products

The industry accounted for nearly 10% of Alberta's international exports. Sales reached close to \$1.5 billion in 1991, increasing by a modest 1.5% over 1990.

Exports of polyethylene, the top industry export, declined by slightly more than \$5 million, but this was more than compensated for by a \$94 million increase in exports of methanol, a product benefiting from tariff elimination under the Canada/U.S. Free Trade Agreement.

Alberta's Major Chemicals & Chemical Products Exports

	1990 (\$000s)	1991 (\$000s)	Percent Change
Polyethylene	430,793	425,486	-1.2
Methanol (methyl alcohol)	114,866	208,380	81.4
Ethylene glycol (ethanediol)	192,576	182,251	-5.4
Urea	162,772	166,609	2.4
Styrene	179,582	148,586	-17.3
Total Above	1,080,589	1,131,312	4.7
Total All Chemicals/Products	1,467,249	1,489,700	1.5

The industry had sales of \$790.5 million to the United States in 1991, representing 53.1% of the value of chemicals and chemical products exports. Polyethylene was the seventh largest-valued product exported to the United States by Alberta companies. Japan was the industry's second largest market with methanol, styrene, and ethylene glycol all ranking within the list of top 15 exports to that country.

Chemicals & Chemical Products Exports Alberta's Main Markets

	1991 (\$000s)	Percent of Total
United States	790,458	53.1
Japan	170,257	11.4

All Countries	1,489,700	100.0

Other Manufacturing

As a group, all other manufacturing industry exports (i.e. excluding industries described above) increased 75.1% by value in 1991 compared to 1990.

Aircraft were the highest-valued export in these remaining industries and the third largest manufactures export overall in 1991. Artificial filament tow, a product of the textiles industry, ranked second, its value of sales remaining virtually unchanged from the previous year.

Alberta's Major Other Manufactured Products Exports

	1990 (\$000s)	1991 (\$000s)	Percent Change
Aircraft, nes, weighing > 15,000 kg	—	369,918	—
Artificial filament tow	79,714	79,526	-0.2
Artificial parts of the body, nes	21,897	30,231	38.1

Alberta Exports by Country, Region, and Industry

The United States continued to be Alberta's main export market, accounting for more than 70% of revenue generated. Compared to 1990, commodity sales to the United States in 1991 increased by almost \$12 million although, on a proportional basis, this change was marginal. The United States' share of Alberta exports declined by nearly two percentage points and, given the overall increase in total exports, this led to an increased export share allocated to non-U.S. markets.

Alberta's Ten Largest Export Markets (\$000s)

	1990	Percent of Total	1991	Percent of Total	Percent Change 1991/90
United States	11,701,380	74.3	11,712,841	72.6	0.1

Total All Countries	15,743,311	100.0	16,138,640	100.0	2.5

Countries other than the United States continued to represent important outlets for Alberta's exports and the majority of these markets have provided expanding opportunities. (Compared to 1988, international sales increased in 97 of Alberta's 146 non-U.S. export markets in 1991.) Among the top ten countries, Japan and China remained Alberta's second and third largest foreign markets respectively. With South Korea falling from fourth largest in 1990 to sixth in 1991, the former U.S.S.R became Alberta's fourth-ranked export destination. Kuwait and the United Kingdom were new additions to the top-ten list for 1991.

Over the latest two-year period, Alberta posted increased export sales to all regions except Africa. Markets of the Middle East region recorded the largest growth, followed by Western Europe and Oceania.

Compared to 1990, Western and Eastern Europe, the Middle East, South America, and Oceania all accounted for larger shares of Alberta's international commodity sales in 1991.

Alberta Exports to Non-U.S. Markets, 1991

United States

Alberta's exports to the United States increased by 8.7% on an average annual basis over the period 1988 to 1991. The gain over this period is overstated. Changes to the data collection methodology were made in 1990 which resulted in improved data capture and higher value estimates arising from the inclusion of freight charges in the valuation process. Consequently, the 0.1% increase in exports to the United States which occurred in 1991 compared to 1990 may be more meaningful.

Alberta's commodity sales to the United States in 1991 amounted to \$11.7 billion, or, 11.3% of the total Canadian export value (up slightly from 11.1% the previous year).

Exports of mining industry products accounted for 70.6% of total value, made up almost entirely of crude petroleum and natural gas. Oil and gas exports to the United States, at \$8.1 billion in 1991, took a slightly higher share of Alberta's total American market (69.2%) than was the case in 1990 (67%). The United States was Alberta's largest foreign market for the oil, gas, and sulphur segment of the mining industry, but fell to third when these categories were excluded.

Products of the primary agriculture industry accounted for 4.1% of total Alberta exports to the United States or for 14.1% if mining industry exports are excluded. The top shipment was live cattle. Manufactures represented 24.1% of the market including mining. If mining is excluded, the share is 82.1%. The United States was Alberta's leading market in all manufacturing industries except textiles and transportation equipment. Exports of the chemicals and chemical products industry took the largest share of manufactured exports with polyethylene representing the leading commodity. Refined petroleum and coal products exports followed with butanes and propane (liquefied) among the top commodity exports.

Exports to the U.S. by Industry

	Percent 1991 \$000s	Percent of Total	Excluding Mining

Note: See Appendix B for more detailed listings.

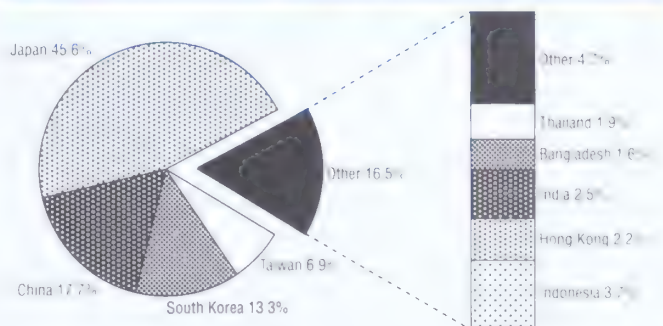

Asia

Although increasing by nearly 1% over the two years ending in 1991, Alberta's exports to Asia have declined by 1.2% on an average annual basis since 1988. The decline was partly attributable to diminished activity in major markets such as China, Taiwan, and India. Moderate gains in exports to Japan, South Korea, and Indonesia were not sufficient to offset these shortfalls.

Alberta Exports to Asia (\$000s)

	1988	1989	1990	1991	Average Annual % Change
Japan	1,000,633	1,140,442	1,157,897	1,099,620	3.2

Alberta Exports to Asia, 1991

After the United States, Asia is Alberta's largest foreign market, accounting for nearly 15% of all commodities exported. The region is the largest foreign market for Alberta's primary agriculture products, taking a 40.2% share of the industry's international exports. Asia is also Alberta's second largest market for exports of manufactures.

Exports to Asia by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	802,264	33.3
Mining	540,654	22.4
Manufacturing	1,032,850	42.8
Food & Beverages	139,840	5.8
Textiles	78,175	3.2
Wood Products	17,021	0.7

Machinery (Ex. Electrical/Transport)	27,596	1.1
Electrical/Electronic Equipment	21,417	0.9
Chemicals & Chemical Products	593,223	24.6
Other Manufacturing	28,060	1.2
Other Exports	35,581	1.5
Total	2,411,349	100.0

Note: See Appendix B for more detailed listings by country.

Japan

Japan is Alberta's largest market in Asia (accounting for 45.6% of exports to the region) and the province's second largest market overall. Although export values increased by 3.2% on an average annual basis from 1988 to 1991, a slight decline occurred over the last two years, due partly to slower economic growth in Japan.

Coal remained the largest single commodity export to the country with mining industry exports as a whole comprising 30.8% of revenue generated. Primary agriculture industry products (mainly rape or colza seeds, wheat, and barley) made up 31.5% of all shipments while manufacturing took a 36.7% share. At \$170.3 million, chemicals and chemical products were the most significant manufactured export, followed by food and beverages at \$123.3 million.

Overall, Japan was Alberta's largest foreign market for mining exports (exclusive of oil, gas, and sulphur); second largest for food and beverages, wood products, paper and allied products, and chemicals and chemical products; third largest for primary agriculture; and fifth largest for fabricated metals.

China

Though not reaching levels achieved in 1988, Alberta exports to China rose steadily over the following three years; China remains the province's third largest foreign market.

In 1991, primary agriculture industry exports comprised 60.1% of Alberta's commodity shipments to China, one of the higher ratios among countries. China represents Alberta's fourth largest market for agriculture products with wheat as a mainstay.

Manufacturing represented a 38.2% share of total exports with significant revenues generated by the chemicals and chemical products industry. China was Alberta's largest

external market for textile products and fourth largest for each of the primary agriculture and chemicals and chemical products industries (and Alberta's second largest market for polyethylene). It was the largest market in Asia for exports of machinery (excluding electrical and transportation equipment) and fifth largest overall.

South Korea

South Korea lost two positions over a four-year period to become Alberta's sixth largest market in 1991; however, the total value of exports to the country has remained virtually unchanged expanding by 0.1% on an average annual basis. This compares to a Canadian rate of growth of 16%.

Primary agriculture industry exports (mainly wheat and raw hides and skins) accounted for 14.7% of Alberta's exports to South Korea. Mining industry products, consisting of coal and crude oil took a 28.9% share. (South Korea is one of the few non-U.S. international markets for Alberta crude.)

Manufactures represented 55.8% of Alberta's commodity exports to the country with chemicals and chemical products (primarily ethylene glycol and styrene) comprising the major sub-component.

South Korea was Alberta's largest Asian market for products of the plastics industry. It was the third largest foreign market overall for mining industry exports and for textiles, paper and allied industry products, and chemicals and chemical products exports.

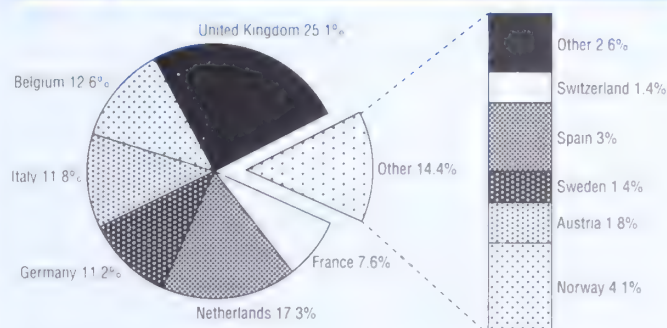

Western Europe

Alberta Exports to Western Europe (\$000s)

	1988	1989	1990	1991	Average Annual % Change
United Kingdom	68,028	57,175	73,536	110,817	17.7

Total	387,807	331,350	369,842	441,808	4.4

Since 1988, exports to Western Europe have expanded by 4.4% on an average annual basis with countries such as Spain, Sweden, and Finland posting impressive rates of growth. Alternatively, Portugal, Switzerland, and the Netherlands were among countries suffering significant losses.

Alberta Exports to Western Europe, 1991

Western Europe accounted for 2.7% of Alberta's total commodity exports in 1991 and for 6.1% of its exports of manufactured products. Two thirds of Alberta's shipments to Western Europe comprised manufactures, well distributed across a number of industries and countries.

Exports to Western Europe by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	57,399	13.0
Mining	45,329	10.3
Manufacturing	288,545	65.3
Food & Beverages	37,957	8.6
Wood Products	8,189	1.9
Paper & Allied Products	64,075	14.5
Primary Metals	22,936	5.2
Fabricated Metals	7,327	1.7
Machinery (Ex. Electrical/Transport)	18,710	4.2
Transportation Equipment	14,765	3.3
Electrical/Electronic Equipment	49,728	11.3
Chemicals & Chemical Products	29,803	6.7
Other Manufacturing	35,056	7.9
Other Exports	50,535	11.4
Total	441,809	100.0

Note: See Appendix B for more detailed listings by country.

United Kingdom

Continued economic recession in the United Kingdom dampened the country's demand for imports in 1991. Canadian shipments, for example, declined by 5.5% on an average annual basis from 1988 to 1991.

Alberta's performance, however, was more robust with export values increasing by 17.7% over the same period. Ranking ninth overall, the United Kingdom remained Alberta's largest market in Western Europe.

Primary agriculture industry exports comprised about 15% of Alberta's commodity shipments to the United Kingdom while exports of manufactures accounted for 76.9%. Main categories of manufactures included: electrical and electronic equipment (\$35.9 million, including a 90% share of \$16.1 million of Canadian exports of telephonic or telegraphic switching apparatus); primary metals (\$12.4 million); paper and allied products (\$9 million); and wood products (\$5.3 million).

The United Kingdom represents Alberta's second largest foreign market for electrical and electronic equipment industry exports, third largest for wood products, fourth for clothing, and fourth for plastics.

The Netherlands

Alberta's exports to the Netherlands increased by \$20.2 million in 1991 compared to 1990 but declined by 11.3% on an average annual basis from 1988. The deterioration bumped the country out of Alberta's top ten export markets.

Primary agriculture industry exports accounted for only 3.5% of total value, manufacturing for 42.5%, and "other" products (mainly low-value export transactions) for 54%. Main manufactures included food and beverage products (\$11.2 million); chemicals and chemical products (\$7.4 million); primary metals (\$6.2 million); and fabricated metals (\$4.6 million).

The Netherlands was Alberta's largest market in Western Europe for chemicals and chemical products, the third largest foreign market overall for food and beverage industry exports and for primary metals, and the fourth largest for fabricated metals.

Belgium

Due partly to Belgium's relatively strong economy, Alberta exports to that country increased from \$48.7 million in 1990 to \$55.7 million in 1991. Belgium was Alberta's third largest market in Western Europe and ranked 17th overall.

Exports consisted 33.1% of primary agriculture products, 18.8% of mining, and 45.6% of manufactures. Semi-chemical wood pulp was the top commodity exported and paper and allied products, generally, accounted for 58% of manufactured exports. Remaining manufactures were more or less evenly distributed among primary metals, chemicals and chemical products, electrical and electronic products, and food and beverages.

After France, Belgium was Alberta's second largest European market for unrefined sulphur and the fifth largest market overall for paper and allied products.

Germany

Alberta's export position in Germany improved in 1991 expanding by 12% over the four-year period beginning in 1988. Germany was Alberta's 20th largest foreign market overall in 1991, up from 23rd position in 1988.

The country was a relatively minor market for products of the primary agriculture industry, which accounted for only 2.5% of total exports. Paper and allied products were the most significant manufactured export, representing 34.5% of a total manufactures export value of \$45.3 million. Manufactured goods as a group accounted for more than 90% of Alberta's shipments to Germany.

Germany was Alberta's second largest foreign market for non-metallic mineral products, third for clothing, fourth for wood products and for paper and allied products, and fifth for electrical and electronic equipment.

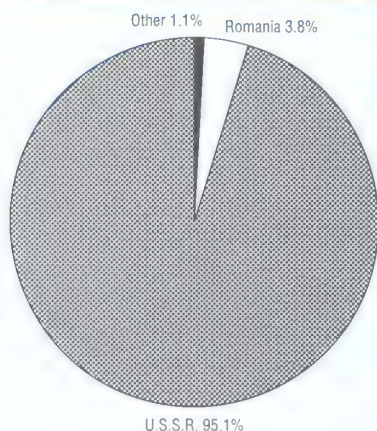

Eastern Europe

Alberta Exports to Eastern Europe (\$000s)

	1988	1989	1990	1991	Average Annual % Change
USSR	266,604	170,227	352,192	380,045	12.5
Romania	41	2,530	9,306	15,104	616.9
Yugoslavia	2,124	3,314	92	2,664	7.8
Hungary	576	180	206	900	16.0
Poland	4,108	5,696	1,518	307	-57.9
Bulgaria	7	86	—	297	248.8
Czechoslovakia	82	2,231	2,099	223	39.6
Albania	65	402	—	165	36.4
Total	273,607	184,666	365,413	399,705	13.5

Over the four-year period ending in 1991, Alberta exports to Eastern Europe expanded at an average annual rate of 13.5% with only the Polish market registering declines.

Alberta Exports to Eastern Europe, 1991

More than 90% of exports to the region consisted of primary agriculture industry products, the highest proportion of any of the nine regional groups portrayed in this report.

Exports to Eastern Europe by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	367,216	91.9
Mining	17,270	4.3
Manufacturing	14,326	3.6
Machinery (Ex. Electrical/Transport)	10,153	2.5
Other Manufacturing	4,172	1.0
Other Exports	894	0.2
Total	399,705	100.0

Note: See Appendix B for more detailed listings by country.

The U.S.S.R.

The former U.S.S.R. was, by far, Alberta's largest market in the region accounting for 95.1% of the total value of exports sold into Eastern Europe. The country represented Alberta's fourth largest international market in 1991 moving from fifth in 1988 with an average annual rate of growth of 12.5%.

Wheat and barley together accounted for 92.6% of Alberta's exports and, overall, the former U.S.S.R. was Alberta's second largest foreign market for products of the primary agriculture industry.

Mining products (unrefined sulphur) accounted for another 3.9% of total value. Modest exports of manufactures, with a total value of \$12.5 million, were spread across a number of industries. The market was Alberta's fourth largest for machinery (excluding electrical and transportation equipment), tenth largest for primary metals, 12th largest for fabricated metals, and 14th largest for transportation equipment.

The Middle East

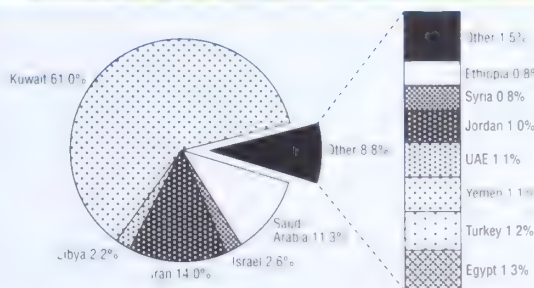

The region was Alberta's fastest-growing foreign market in 1991, with the value of exports expanding by 43.2% on an average annual basis since 1988. Exports to Kuwait skyrocketed from less than \$1 million to more than \$300 million over the period. Gains were also registered for 14 other countries in the Middle East. Iraq was one of five countries posting losses with the export embargo eliminating sales in 1991. Iraq had been Alberta's leading Middle East market in 1988.

By industry, manufacturing accounted for three quarters of the total value of Alberta commodities exported to the Middle East, one of the higher proportions among regions. The Middle East was the destination for 8.4% of Alberta's international sales of manufactures.

Alberta Exports to the Middle East (\$000s)

	1988	1989	1990	1991	Average Annual % Change

Note: See Appendix B for more detailed listings by country.

Kuwait

This Middle East country ranked as Alberta's fifth largest foreign market in 1991 primarily because of the shipment of several high-valued aircraft. Even removing this aberration, however, Alberta's exports to Kuwait have increased at an average annual rate of 361.9% since 1988.

All exports were manufactures, consisting almost entirely of machinery (excluding transportation equipment exports). Kuwait was Alberta's third largest market for products of this industry.

Iran

Iran was Alberta's 27th largest international market in 1988, but with export values increasing at an average annual rate of 30.3%, the country ranked 14th by 1991.

Primary agriculture industry exports accounted for roughly two thirds of total value and manufactures for the remainder. Machinery (excluding electrical and transportation equipment) was the main manufactured export, accounting for 80.4% of total export revenue generated by manufactures in Iran.

Iran was Alberta's second largest foreign market for machinery (excluding electrical and transportation equipment), the fifth largest for the primary agriculture industry, and the largest Middle East market for food and beverage and plastics industry exports.

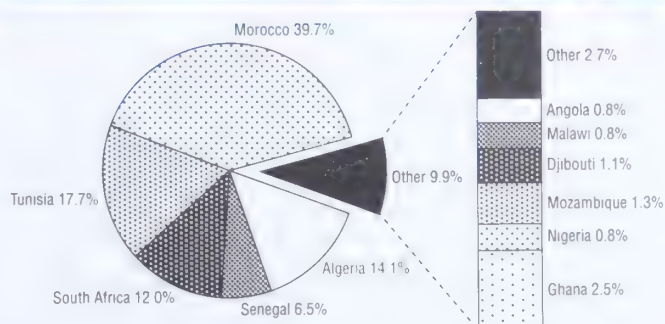

Saudi Arabia

Saudi Arabia was Alberta's 16th largest international market in 1991. As in Iran, about two thirds of exports were primary agriculture products, although barley, rather than wheat, was the main shipment. Manufactured exports were somewhat more diversified, dominated by fabricated metals but also including respectable amounts of machinery (excluding electrical and transportation equipment), transportation equipment, and wood products.

Saudi Arabia was Alberta's second largest foreign market for fabricated metals and fifth largest for wood products.

Africa

Alberta Exports to Africa, 1991

Alberta Exports to African Nations (\$000s)

	1988	1989	1990	1991	Average Annual % Change

As a region, Africa posted the largest decline in the value of goods purchased from Alberta, with exports falling by 15.6% on an average annual basis over the four-year period ending in 1991. Much of the shortfall was attributable to declines in major markets. Exports to Morocco, for example, fell from \$225.1 million in 1988 to \$91.5 million in 1991.

Principal exports to Africa were mining industry commodities (unrefined sulphur), which accounted for 67.5% of total value. Primary agriculture industry products took an additional 21% share; manufactures a 9.1% share.

Exports to Africa by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	48,488	21.0
Mining	155,502	67.5
Manufacturing	20,861	9.1
Food & Beverages	8,958	3.9
Paper & Allied Products	2,315	1.0
Machinery (Ex. Electrical/Transport)	3,290	1.4
Electrical/Electronic Equipment	1,757	0.8
Chemicals & Chemical Products	2,074	0.9
Other Manufacturing	2,467	1.1
Other Exports	5,543	2.4
Total	230,394	100.0

Note: See Appendix B for more detailed listings by country.

Morocco

With exports declining by 25.9% on an average annual basis, Morocco dropped from Alberta's sixth largest export market to its 11th. Still, Morocco was Alberta's largest commodity export destination in Africa.

Sulphur, accounting for almost 96% of total value, dominated Alberta's exports to the country. After the United States, Morocco was Alberta's largest foreign market for unrefined sulphur and fourth for mining products overall. Although primary agriculture represented a small portion of export activity, Alberta accounted for one quarter of the Canadian industry's shipments to Morocco.

Tunisia

Tunisia is also a sulphur-dominated market with the mining commodity accounting for 98.1% of Alberta's total export sales to the country. Tunisia was Alberta's third largest foreign market for unrefined sulphur in 1991.

Algeria

Algeria was Alberta's 26th largest foreign market in 1991, moving up from 28th four years earlier as a result of average annual export growth of 2.9%. The market consisted 77.3% of primary agriculture industry products, primarily durum wheat. After the former U.S.S.R., Algeria was Alberta's second largest market for this variety of wheat and accounted for 22.7% of durum wheat exports. Overall, it was the 11th largest foreign market for primary agriculture exports.

The remaining sales were manufactures, mainly food and beverage industry exports. Tunisia was Alberta's fifth largest foreign market for products of this industry.

■ South America

Brazil has consistently been Alberta's largest market in South America, accounting for more than 50% of the value of goods exported to the region in 1991. Partly as a result of increasing sales to Brazil, Alberta exports to South America increased by 4.2% on an average annual basis from 1988 to 1991. Among major regional markets, only Colombia registered declining values over this period.

Exports comprised mainly primary agriculture industry products which took a 48.9% share of total value. Mining products, principally unrefined sulphur, accounted for another 36%. Manufactures, including electrical and electronic equipment, chemicals and chemical products, and paper and allied products, represented 14.2% of Alberta's South American market.

Exports to South America by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	92,071	48.9
Mining	67,673	36.0
Manufacturing	26,674	14.2
Paper & Allied Products	2,583	1.4
Machinery (Ex. Electrical/Transport)	1,045	0.6
Electrical/Electronic Equipment	9,420	5.0
Chemicals & Chemical Products	9,805	5.2
Other Manufacturing	3,820	2.0
Other Exports	1,804	1.0
Total	188,221	100.0

Note: See Appendix B for more detailed listings by country.

Brazil

Trade with Brazil has been steady with the country maintaining its position as Alberta's 10th largest foreign market.

Over the period 1988 to 1991, exports to Brazil increased at an average annual rate of 2.7%.

The market in 1991 comprised 41% primary agriculture industry exports, 54.6% mining, and 4.4% manufactures. About half of manufactures exports were accounted for by the chemicals and chemical products industry.

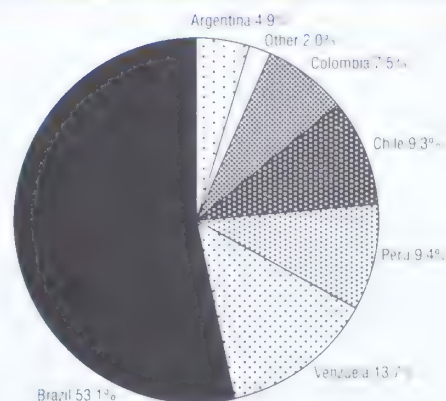

Brazil was Alberta's seventh largest foreign market for primary agriculture industry exports (mainly wheat), fifth largest for mining industry products (and the largest South American market for unrefined sulphur), and the fifth largest market for non-metallic mineral products exports (magnesia).

Venezuela

The value of Alberta exports to Venezuela increased at an average annual rate of 5.6% over the four-year period ending in 1991. Despite this growth, however, the country dropped a position to become Alberta's 30th largest foreign market.

Exports were concentrated in primary agriculture, mainly wheat, for which Venezuela was Alberta's 12th largest foreign market overall. Manufactures accounted for 2% of exports with small amounts originating in the electrical and electronic equipment, chemicals and chemical products, and machinery (excluding electrical and transportation equipment) industries.

Alberta Exports to South America, 1991

Peru

Peru was the fastest growing market in South America. With the value of Alberta exports expanding by 35.9% on an average annual basis, Peru moved from Alberta's 47th largest foreign market in 1988 to 34th largest in 1991. Primary agriculture industry products (mainly wheat) took a 35.9% share of total exports. Mining products — all unrefined sulphur — took another 2.3%.

Peru was one of the larger South American markets for Alberta manufactures, accounting for 61.9% of total export

sales. Paper and allied industry exports (semi-chemical wood pulp) accounted for 23% of manufactures while electrical and electronic industry exports took the largest share — 71.4%. Peru was Alberta's fourth largest foreign market for this industry.

Chile

Alberta exports to Chile expanded at an average annual rate of 9.2% over the period 1988 to 1991 to rank 35th after Peru. Shipments were distributed 23.2% to primary agriculture (wheat), 29.3% to mining (sulphur), and 46.5% to manufactures.

Manufactures consisted mainly of exports of the chemicals and chemical products industry. Chile was Alberta's largest South American market for urea (Alberta was, in turn, Chile's only Canadian supplier) and fifth largest market overall.

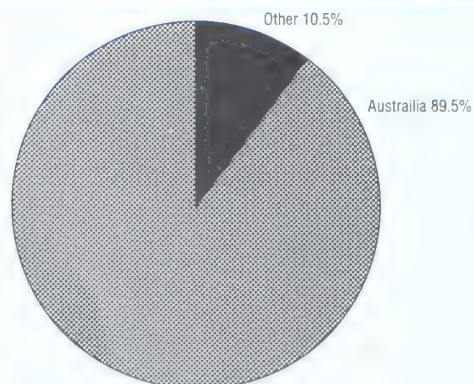

Oceania

Alberta Exports to Oceania (\$000s)

	1988	1989	1990	1991	Average Annual % Change
Australia	99,982	101,500	89,745	117,268	5.5
New Zealand	16,770	21,559	20,344	13,210	-7.6

Vanuatu	—	9	—	—	N/A
Total	118,536	123,930	113,795	131,014	3.4

The region was dominated by the Australian, and to a lesser extent, the New Zealand markets. On an average annual basis, exports to Oceania increased by 3.4% from 1988 to 1991 but this was almost entirely the result of a 5.5% increase in sales to Australia over the same period.

Alberta Exports to Oceania, 1991

The Oceanian market was dominated by sales of manufactures which accounted for more than 90% of total exports to the region. Manufactures comprised primarily transportation equipment and chemicals and chemical products exports.

Exports to Oceania by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	2,195	1.7
Mining	7,717	5.9
Manufacturing	120,438	91.9
Textiles	1,387	1.1
Machinery (Ex. Electrical/Transport)	2,827	2.2
Transportation Equipment	62,225	47.5
Chemicals & Chemical Products	47,906	36.6
Other Manufacturing	6,093	4.7
Other Exports	666	0.5
Total	131,016	100.0

Note: See Appendix B for more detailed listings by country.

Australia

With the value of exports increasing by 5.5% on an average annual basis over the four-year period beginning in 1988, Australia became Alberta's eighth largest foreign market in 1991. The country was the major export destination in the region, accounting for almost 90% of total sales.

With primary agriculture products comprising only 1.4% of export value and mining an additional 2.2%, manufactures accounted for the bulk (95.9%) of Alberta's trade. Australia was the second largest foreign market for Alberta's transportation equipment industry with exports accounting for 55.2% of the total value of manufactures sold. Chemicals and chemical products exports took an additional 37% share; Australia was Alberta's third largest international market for urea and also third for polyethylene.

New Zealand

Alberta's exports to New Zealand declined from \$16.8 million in 1988 to \$13.2 million in 1991, an average annual decline of 7.6%. Consequently, New Zealand dropped from being Alberta's 35th largest market to its 41st.

The New Zealand market for Alberta sulphur was, nonetheless, nearly twice the size of the Australian market. Mining industry exports accounted for 39% of Alberta's total commodity sales in New Zealand. Manufactures, three quarters of which were chemicals and chemical products, accounted for 56.6% of exports. New Zealand was Alberta's ninth largest market for the industry's main commodity — polyethylene.

Central America, Mexico, and the Caribbean

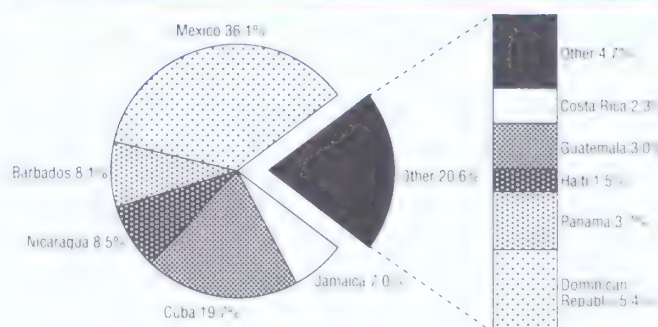

Alberta Exports to Central America, Mexico, and the Caribbean

	1988	1989	1990	1991	Average Annual % Change

Guadeloupe	1,232	6	—	—	-100.0
Total	149,203	124,798	95,650	96,110	-13.6

Exports to the region dropped by 13.6% on an average annual basis over the four-year period ending in 1991. This was attributable, in part, to declines in the two major markets (Mexico and Cuba) which, together, accounted for 55.8% of total exports to the region. The Dominican Republic, although a relatively minor export destination, was Alberta's fastest-growing foreign market over the period 1988 to 1991.

Exports were well balanced by industry with primary agriculture accounting for 35.5% of total value, mining for 22.5%, and manufacturing for 31.7%. About half of manufactures consisted of chemicals and chemical products with smaller amounts sold by the food and beverages, electrical and electronic equipment, and paper and allied products industries.

Alberta Exports to Central America, Mexico, and the Caribbean

Exports to Central America, Mexico and the Caribbean by Industry

	1991 \$000s	Percent of Total
Primary Agriculture	34,119	35.5

Other Exports	9,910	10.3
Total	96,108	100.0

Note: See Appendix B for more detailed listings by country

Mexico

Although Mexico is still the largest market in the region, Alberta exports to this country declined by 23.3% from 1988 to 1991. Mexico was Alberta's 12th largest international export market in 1988 but had dropped to 24th by 1991.

At \$7.65 million, primary agriculture industry products accounted for 22% of the total export value, with shipments comprising mainly wheat and some barley. Mining industry products took an additional 54.3% share. The industry's exports consisted entirely of unrefined sulphur, making Mexico Alberta's seventh largest foreign market for the product.

Manufactures, accounting for 22.2% of export value, included shipments from the food and beverages, paper and allied, and chemicals and chemical products industries. Mexico was Alberta's eighth largest foreign market for products of the food and beverages industry (primarily powdered milk) and 12th largest for paper and allied industry exports (mainly semi-chemical wood pulp).

Cuba

Alberta exports to Cuba declined from \$44 million in 1988 to \$18.9 million in 1991, an average annual decline of 24.5%. The country was Alberta's 32nd largest foreign market in 1991.

Cuba was, however, Alberta's most significant market in the region for shipments of the primary agriculture industry, consisting mainly of wheat. Mining industry exports (all unrefined sulphur) accounted for 14.7% of Alberta's Cuban export market. Manufactures, exports of which were 88% food and beverage industry products, took a 6.1% share of total sales.

* 1990 expenditures in Alberta by residents of the United States.

Note: Statistics Canada revised its methodology for collecting data to the U.S. in 1990. Consequently, comparability with previous years' data may not be meaningful. Exports to Puerto Rico and the U.S. Virgin Islands are included in the total values.

USSR

Capital: Moscow
 Official Language: Russian

In Alberta, Canada environmental protection is more than a philosophy.

It's our business.

In Alberta, economic development has always been balanced by environmental responsibility. Twenty years ago, Alberta created Canada's first provincial department of the environment. Since then, our philosophy of

environmental protection has become a thriving business.

Applying the engineering expertise we've developed in our traditional industries like energy, Alberta companies have become world leaders in environmental protection technologies, products and services. Alberta companies are in the business of recycling, disposal of hazardous wastes, pollution control and many other areas.

Find out for yourself how the environment can benefit when philosophy and business meet. Contact Alberta Economic Development and Trade today.
